PROJECTS

Food Order Application

Mar 2025

Tech Used: MongoDB, Express.js, React.js, Node.js (MERN Stack)Developed a full-stack food ordering app where users can browse menus, place orders, and manage their cart. The front-end is built with React.js for a dynamic and user-friendly interface. Back-end APIs are built using Node.js and Express.js, with MongoDB handling data storage for users, orders, and products. The app includes user authentication, order tracking, and admin dashboard features.

Real-Time Chat App

Jan 2025 - Feb 2025

Tech Used: HTML, CSS, JavaScript, Node.js,Socket.ioDeveloped a real-time chat application where users can join chat rooms and communicate instantly. The app uses Socket.io for live message exchange, with features like user join/leave notifications and active user display. The front-end is built with HTML and CSS, while the back-end uses Node.js and Express.js for handling real-time events.

School Management System

Jan 2025 - Feb 2025

Tech Used: MongoDB, Express.js, React.js, Node.js (MERN Stack)Built a full-stack web application to manage school operations like student records, attendance, and teacher data. The front-end is developed using React.js for a responsive UI, while the back-end uses Node.js and Express.js for RESTful APIs. MongoDB is used to store and manage data securely and efficiently. The system supports role-based access for admins, teachers, and students

SKILLS

- JavaScript
- Express.js
- HTML
- Node.js
